

Injury Statistics

According to the Bureau of Labor Statistics, March 2004, healthcare workers now **rank #1** in being at risk for musculoskeletal injuries at work.

~ ~ ~

The Bureau of Labor Statistics also reports that in 2004, there were 282,240 reported back injuries by workers.

~ ~ ~

“Healthcare workers are 40% more at risk for back injuries than the general population, “ - Nursing Effectiveness, Utilizations and Outcomes Research Unit, Faculty of Nursing, University of Toronto, 2003.

The PAL Can Help

The PAL helps reduce potential hazards of patient handling by promoting **team lifting** and proper ergonomics.

The PAL is also a viable option to help conform to the **new lifting laws** imposed upon Texas healthcare workers in 2006.

Transfer PAL

The Transfer PAL is used to transfer patients to and from wheelchairs, beds and chairs.

Key Benefits

- Easy to apply
- Patient remains in sitting position
- Power grip handles help with lifting
- Provides patient comfort during transfer
